

GUITAR OF THE MONTH – JULY 2009

Launched in 2007, the Tanglewood Evolution Series aims to redefine what should be expected of entry-level acoustic guitars. With its rich, clear, loud voice and impressive craftsmanship, the **TW28-CSN-CE** dreadnought lives up to that challenge. Warm tones seem to pour out of the soundhole of this solid cedar-topped instrument. A gentle satin finish lends a rustic character to the guitar, and features such as its bone nut & saddle, maple binding, abalone rosette, and Fishman Ion pickup/preamp system ensure that the “entry-level” designation can only be applied to this guitar’s price point – not its quality.
